

Python Fundamentals 1 - Week 3 Tasks

Task 1: Sum (15 minutes)

Task: Create a program that asks you for two numbers, and then prints the sum of those two numbers.

Requirements: If one of your inputs is not a number, then the program should treat it as if it is a 0. Failure to do this will result in a 20% deduction of marks. This is quite a hard task, so you don't have to do it, but it is definitely encouraged!

Input: You will give two numbers for the program to add up.

Output: The program will print the sum of those two numbers.

Hints for this exercise:

If you want the program to input a number and a number only (not a string), try:

```
number = int(input("Enter your number here: "))
```

If a variable called number is "5" (a string) and you want to turn it into a number, try:

```
number = int(number)
```

To check whether your number is an integer, try:

```
if number.isnumeric():
```

To test your program: Type the following into the terminal, or press the triangle button on the top right of your program in visual studio:

```
cd week3  
python sum.py
```

Sample output

```
PS C:\Users\Oscar\Documents\Git\Github Test 1\icc_pyf1> & C:/Users/Oscar/AppData/Local/Microsoft/WindowsApps/python3.10.exe "c:/Users/Oscar/Documents/Git/Github Test 1/icc_pyf1/Week3/sum.py"
Please input your first number to add: 5
Please input your second number to add: 7
Your sum is 12.
PS C:\Users\Oscar\Documents\Git\Github Test 1\icc_pyf1> & C:/Users/Oscar/AppData/Local/Microsoft/WindowsApps/python3.10.exe "c:/Users/Oscar/Documents/Git/Github Test 1/icc_pyf1/Week3/sum.py"
Please input your first number to add: a
Please input your second number to add: 7
Your sum is 7.
PS C:\Users\Oscar\Documents\Git\Github Test 1\icc_pyf1> & C:/Users/Oscar/AppData/Local/Microsoft/WindowsApps/python3.10.exe "c:/Users/Oscar/Documents/Git/Github Test 1/icc_pyf1/Week3/sum.py"
Please input your first number to add: a
Please input your second number to add: b
Your sum is 0.
```

Double Check: To test if your program matches up with the answer, type the following into the terminal, or click it in your file explorer:

```
cd week3
./sum.exe
```
